

Community Cat Program

What is a community cat? - a cat that has been fixed, vaccinated and eartipped then released back into the area from which it was found. They are the unowned stray or feral (unsocialized) cats who live outdoors in our neighborhoods with or without a particular caretaker.

Community cats may be temporarily brought inside a colony caretaker's residence, for their protection, in the event of severe environmental conditions or medical necessity.

Community Cat Care Guidelines

1. Make reasonable attempts to fix (trap-neuter-return) all the cats in the colony. Cats need to be fixed, have a rabies vaccination, eartip for ID and returned to their familiar outdoor home. Call (317) 638-3223 and ask for the "community cat package" to make an appointment.
2. Provide adequate food and water for the cats on a daily basis. Feed cats in the am if possible and do not leave food out overnight so as not to attract wildlife.
3. Provide adequate shelter for the number of cats in the colony if they do not have an established shelter area.
4. Make reasonable attempts to ensure that any community cats that are injured or ill receive prompt medical treatment. Call the FACE Low-Cost Animal Clinic at (317) 638-3223.
5. Maintain records of spay/neuter and rabies vaccinations for cats you monitor.
6. Make efforts to place tame colony cats and kittens with adoption groups as resources allow.
7. If you can no longer properly care for your colony, contact IndyFeral as soon as possible to assist with identifying an alternate caretaker or placement.
8. Be a good steward for the cats. Help cats and people co-exist by readily addressing or educating others in regard to any concerns or conflicts they may have about the cats. Help community cats maintain a good image and their good neighbor status.
9. Report acts of neglect, cruelty, abandonment or abuse directed against any cat(s). Call the Mayor's Action Center at (317) 327- 4622 <http://www.indy.gov/egov/mayor/mac/Pages/home.aspx>

cat with eartip

Fixing the cats/Trap-Neuter-Return (TNR) coupled with proper feeding, shelter and on-going health monitoring stops the unchecked breeding of the cats, improves their lives and allows the colony to diminish naturally over time. Failure to properly care for community cats can exclude you from our program.

For additional assistance call our help desk at (317) 638-3223 #113 or visit www.faceanimalclinic.org

Community Cat Medical Care -

- FACE Low-Cost Animal Clinic - 1505 Massachusetts Ave. Indpls. IN 46201. Call (317) 638-3223 Hours: M-F 10-4pm, Sat 10-2pm. The Community Cats Coordinator can be reached at (317) 638-3223 ext. 100 or by email at communitycats@facespayneuter.org for special arrangements.

Cat Shelters and Feeding Stations

Plastic Tote Shelter – A shelter anybody can make; suitable for one to two cats.

Start with a 30 gallon tote for one to two cats

Cut 5 1/2" diameter hole in tote

Insert Styrofoam cooler and cut hole in Styrofoam to match tote

Add straw

Add Styrofoam lid

Add tote lid—finished!

After the cats have begun using the tote shelter, you might want to add a door flap made of heavy plastic or heavy vinyl for further wind/weather protection.

If you need to house more cats, just purchase a larger plastic tote.
